

CARESCAPE Monitor B850
Connecting intelligence and care.

A high level of monitoring excellence.

A consistent level of care.

The clinically advanced CARESCAPE* Monitor B850 helps caregivers by providing clinical tools and parameters to meet even the highest acuity patient needs. Designed by clinicians for clinicians, the monitor is fully modular and configurable to meet your ever-changing clinical demands, to help ensure reliable results at every stage of patient care.

Exceptional clinical intelligence is delivered through a comprehensive set of parameters, including innovative gas and respiratory monitoring. The CARESCAPE Monitor B850 supports cardiac diagnostic excellence with the GE EK-Pro* algorithm and two-way communications with the MUSE* ECG management system, providing ECG serial comparison capability. All of this is delivered in an intuitive, easy-to-use interface powered by Linux®.

Data flow that fits your workflow.

The CARESCAPE Monitor B850 is an intuitive system that fits how you work and handle patient data. It offers a comprehensive set of parameters that can be customized by care area to integrate seamlessly across your enterprise. Just as your care areas need to be adaptable, the CARESCAPE Monitor B850 helps you respond to changing conditions with inherent flexibility and scalability, as well as customizable alarms and reports.

A bright vision for the future.

With the CARESCAPE Monitor B850, you get the monitoring tools you need today—on a modular platform that can grow with your needs tomorrow. As part of a scalable system, the CARESCAPE Monitor B850 is designed to leverage the networks you already use while enabling cost-effective access to technology that will support quality outcomes in the future.

For more information about the CARESCAPE Monitor B850 and the entire portfolio of CARESCAPE modular monitors, please contact your GE Healthcare representative.

Customizable alarms help you respond to patient-specific conditions and may help you reduce the nuisance effect.

Seamless data flow lets you view data via integrated Citrix® thin client, and report directly into HIS/EMR through the CARESCAPE Gateway. Even when you're off-site, remote access to labs, X-rays, charting, and other data via mobile devices lets you stay close to your patients and enables rapid, informed decision-making.

About GE Healthcare

GE Healthcare provides transformational medical technologies and services that are shaping a new age of patient care. Our broad expertise in medical imaging and information technologies, medical diagnostics, patient monitoring systems, drug discovery, biopharmaceutical manufacturing technologies, performance improvement and performance solutions services help our customers to deliver better care to more people around the world at a lower cost. In addition, we partner with healthcare leaders, striving to leverage the global policy change necessary to implement a successful shift to sustainable healthcare systems.

Our “healthymagination” vision for the future invites the world to join us on our journey as we continuously develop innovations focused on reducing costs, increasing access and improving quality around the world. Headquartered in the United Kingdom, GE Healthcare is a unit of General Electric Company (NYSE: GE). Worldwide, GE Healthcare employees are committed to serving healthcare professionals and their patients in more than 100 countries.
